

# Reference Letter

Dear Admission Officers,

Since September 2023, I have had the distinct pleasure of instructing Mr. Huang Jiacheng on his research project, *mmPowerHAR: A Framework Using mmRadar for Human Activity Recognition in Power Station*. Behind the fruitful accomplishments, his diligence and dedication to research, as well as persistence in making progress were the explicit reasons.

Evidently, Jiacheng was studious in his research endeavors with full devotion. In his second year of undergraduate studies, he became a valuable addition to my research group. His keen enthusiasm and technical prowess in the realm of human behavior recognition projects led me to entrust him with the development of millimeter wave radar technology. Throughout our collaborative research efforts, he consistently emphasized the significance of teamwork and regular communication. We convened weekly group meetings where we presented our progress in either Markdown or PPT format, fostering an atmosphere conducive to tracking project advancement and promoting mutual learning among team members. In particular, during the course of the millimeter-wave radar human posture recognition project, Jiacheng assumed responsibility for tasks such as acquiring radar data, mastering radar data processing techniques, and devising targeted deep learning algorithms. His exceptional technical proficiency and problem-solving acumen were prominent as he successfully achieved human body position recognition within the domain of millimeter wave sensing, which is poised for submission to The China Graduate Electric Design Contest.

Beyond his project-related achievements, Jiacheng demonstrated a rigorous commitment to scholarly inquiry by proactively documenting the research process and disseminating findings through various forums. For instance, he generously shared uploader code for millimeter wave radar data acquisition on platforms like GitHub and TI Forums, garnering positive feedback from peers at other academic institutions. Furthermore, Jiacheng's active involvement in crafting a research paper based on the project work reflected his ambition for academic advancement; having reviewed this paper myself, I could easily attest to its quality and potential contribution to the field of human position recognition. Notably, Jiacheng has taken proactive steps by submitting this paper with his team to the esteemed *IEEE Transactions on Network Science and Engineering* - a testament to his unwavering dedication towards scholarly pursuits.

Given my assessment of Mr. Huang Jiacheng's research capabilities and potential, I wholeheartedly believe that he has been equipped with all the qualities of an elite candidate. His technical expertise, coupled with his passion for scientific inquiry and dedication to his work will lead to more fabulous contributions in his advanced studies. If there is any question regarding his reference, please feel free to contact me at any time.

Sincerely,

Jiang Hao
