To Whom it may concern,

As his project supervisor, I have been impressed by Mr. Huang Jiacheng's outstanding performance and inquisitive spirit. Therefore, I would like to recommend this potential youth to your prestigious master's programme.

During the collaboration with the Power System and Equipment Industry Research Institute of Fuzhou University, I guided the development of deep learning algorithms for the human behavior recognition project team. With the support of Texas Instruments, Mr. Huang successfully achieved real-time data collection using TI's millimeter wave radar evaluation board, which led to the realization of posture recognition for power operators through deep learning algorithms. He has demonstrated exemplary technical skills and solid professional knowledge, as well as the distinctive creativity in this project. Providing an advanced and reliable means for distribution stations to ensure the safety of personnel, his work was of high practical value. Beyond that, I could see his advantage in cooperation from the positive reviews of his teammates and the smooth development of the project.

Another project I worked closely with Jiacheng was the Development of an Indoor Positioning Miniature UAV for Industrial Site Inspection. As the key role in the development of indoor inspection drones, he was accountable for the development of indoor positioning technology. His profound research into related technologies and his skillful utilization of advanced algorithms and methods enabled him to realize precise positioning and navigation of drones in indoor environments. It became evident during this process that Mr. Huang's exceptional abilities to learn and apply new skills were instrumental in solving technological challenges and designing feasible plans for the advancement of indoor inspection drone technology.

In conclusion, Mr. Huang Jiacheng is a talent of diligence, meticulousness, and a high level of passion for his work. He is adept at analyzing and resolving practical issues and demonstrates effective communication and teamwork abilities. Given his high sense of responsibility and considerable academic potential, I am confident that he would be an invaluable addition to your programme. Should you be of any further assistance, please do not hesitate to reach out to me.

Sincerely,

Dr. Chen Zhenghua

Scientist, Lab Head/Principle Investigator/PhD Advisor, I2R, A\*STAR, Singapore
